Satyam Kumar

has successfully completed the online, non-credit Specialization

Generative AI for Developers

In this Specialization, learners developed and honed essential skills for today's dynamic workforce by combining practical Python programming with the power of generative AI. The curriculum encompasses a wide array of critical competencies, ensuring participants are well-prepared to tackle real-world challenges in technology and data science. They also explore advanced concepts in generative AI, learning to leverage tools like Gemini, Co-pilot, and ChatGPT for efficient code creation, error resolution, and enhanced creativity.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
